More parts and wholes:

5. If this discrete collection has a value of $1 / 3$, show 1 :
$\bigcirc \bigcirc \bigcirc$
$\bigcirc \bigcirc \bigcirc$
6. If this discrete collection has a value of $2 / 3$, show 1 :
$\bigcirc \bigcirc \bigcirc$
$\bigcirc \bigcirc \bigcirc$
7. If this discrete collection has a value of $11 / 2$, show 1 .
$\bigcirc \bigcirc \bigcirc$
$\bigcirc \bigcirc \bigcirc$
8. Explain which of these discrete collections makes it easier to solve the problem:

If this discrete collection has a value of $2 / 5$, show 1
a. $\bigcirc \bigcirc$
b. $\bigcirc \bigcirc \bigcirc \bigcirc$

Tell 3 other discrete collections for which it would be easy to answer the problem If this discrete collection has a value of $2 / 5$, show 1 .

What do your examples have in common?
