

Naming sets and elements practice:

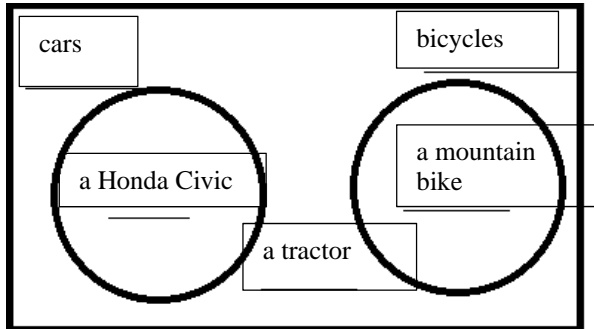

1. The universe is Things in North Hall. Name two sets in the universe that overlap (and there are elements in each possible region). Give an example of an element in each of the 4 regions

Things in North Hall

2. The universe is Vehicles. Name two sets in the universe that don't overlap (and there are elements in each possible region). Give an example of an element in each of the 3 regions.

Vehicles

3. The universe is plants. Give an example of a set and a subset (and there are elements in each possible region). Give an example of an element in each of the 3 regions.

Plants
