

1. For each of these shapes:

- Find a convenient side and label it the base
- Find the height (draw and label)
- Find the area using the base and height measurements.

2. For each of these shapes, break it into smaller shapes to find the area by adding up smaller shapes. Organize and present your answer in a way that is clear and easy to follow.

3. For each of these shapes, find the area by subtracting missing parts from a larger shape. Organize and present your answer in a way that is clear and easy to follow.
