

Multiplication Practice:

1. For the problem: 37×24

A. Sketch and color the grid as appropriate

B. Solve using the expanded algorithm and color code to match the grid

2. Solve the problem 247×36

A. Using the expanded algorithm

B. Using the standard algorithm

C. Explain the standard algorithm as if talking to a student who understands the expanded algorithm

3. For the problem: 127×43

A. Draw a diagram (similar to stamp game or checkerboard), and color code

B. Solve using lattice multiplication and color code to match A.
